

# THE MANY FACES OF QUALITY

## Mobile App now available

Dear Bill

In order to improve your conference experience we have teamed with CrowdCompass to build an app for PNSQC 2013. The app runs on both Apple (iPhone, iPad) and Android platforms. Other platforms can use the browser based "app". Use the app to:

- Access the event schedule
- Create a personal schedule of events
- Review paper abstracts and bios for all sessions
- Find the location of a particular session
- Share contact information
- Complete paper evaluations

Download the App

- <https://crowd.cc/Ve> links from your mobile device
- Go to your app store and search for "pnsqc" or "pacific northwest software"
- For those without an Apple or Android device, access the app through your browser at: <https://crowd.cc/pnsqc-2013>

Creating an Account

After installing create an account. This will allow access to certain features of the app including setting bookmarks and creating a personal schedule. It also allows you to define and share contact information with other attendees. Learn more about the mobile app at the [PNSQC blog](#).

PNSQC 2013 Proceedings Online

A reminder that the [PNSQC 2013 Proceedings](#) are now available to all registered attendees. Please use this password protected webpage to review the materials that will be presented at the PNSQC 2013 technical program. Please note that the printed Proceedings will only be available onsite for the individuals that pre-ordered a copy.

Password: PNSQC\_Papers2013

*The mission of PNSQC is to enable knowledge exchange to produce higher quality software.*
